

## Discover what ring size you have.

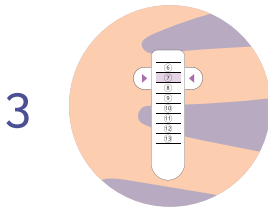

Print this page at 100% scale, without shrinking or enlarging it. (To verify that you have printed at the correct scale, place a credit card or another card of the same size on the box below: if the edges match, you are all set.)

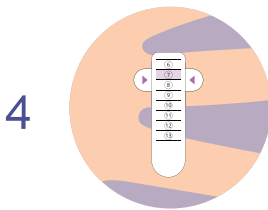

Cut out the paper template, place the widest part at the point where you would wear the ring, and secure it with adhesive tape for a more precise measurement.

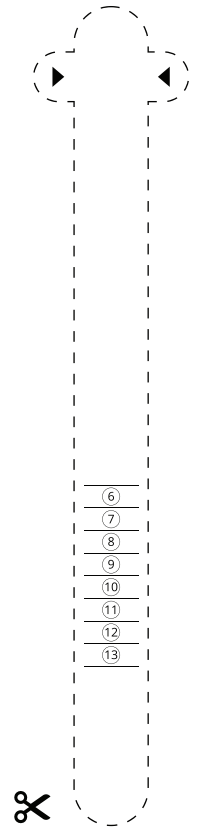

Wrap the paper template around your finger at the point where you would wear the ring. Make sure it is tight: it should not move.

The number you see between the arrows indicates your ring size.

If the arrows point to the line between two numbers, choose the smaller size.

Place a credit card or another card of the same size here to check that you have printed at 100% scale.
